

## On-Demand Local Training

The Wyoming Pipeline Association is comprised of pipeline operators with facilities in Wyoming. They are offering **FREE** pipeline emergency response training covering the basic properties of natural gas and other petroleum products as well as hazmat response, meters, and command center coordination.

Experienced hazmat instructors are available for day, evening, and weekend training sessions. The sessions typically are 2-3 hours long and involve interactive exercises customized to meet the needs of your organization. Local pipeline operator personnel will be there to provide specific information about their facilities and response capabilities.

If your organization is interested in FREE training, please fill out the Online Training Request Form at: <https://wypa.pipelineawareness.org/wypa-on-demand/> or access the form on your mobile device with the QR code below:
